\* A11.2.00.001 *Glandula pinealis* This is known under many different names, e.g. *epiphysis cerebri*, *corpus pineale*, *organum pineale*, *glandula pinealis*, *conartum*, commonly used English terms being pineal gland, pineal body, or simply pineal. The term *glandula pinealis* is preferred, because the endocrine function of the pineal gland has been established beyond any doubt.
