Guided tour on the selections of the top menu of the website

View all top selections

IFAA Fribourg website

Introduction page

This guided tour documents the *top menu* of the website. This menu is presented in three groups of selections, respectively for the lists, the documentation and the management of the website. Each group will be examined in turn in this tour.

The website of the terminology follows three principles in its implementation. They are:

1. To be the original source of the Terminologia Anatomica Humana TAH,

2. To satisfy the expectation of the experts in anatomy about anatomical terms and their management,

3. To make a didactic presentation of the terminology for the casual users.

Table of Contents

How-to on published lists

The selection "Published lists" on
the *top menu* provides access to all
the published lists of the website.
The published lists are the
partonomic lists of a whole chapter,
frozen at some point in time.
This mechanism allows to store
the memory of the site, after a

substantial validation has been performed. It is like a
publication of the terminology, stamped by its date of
realization.

‹ Return

How-to on partonomic lists

The selection "Partonomic Lists"
on the *top menu* provides access to
all the partonomic lists and sublists.
A direct access is possible
to the top level lists of each chapter
and an indirect access to all other
lists is given through the interlist
navigation. The whole terminology
is accessible by the partonomic lists.

Access to the lists

Alphabetic lists

The partonomic lists are always presented in two languages,
usually Latin and a modern language. The language selection is
set in advance and remains permanent, but can be changed at
any moment.

◀ Return

How-to on taxonomic lists

The selection "Taxonomic Lists"
on the *top menu* provides access to
all the taxonomic lists and sublists.
The whole terminology
is accessible by the taxonomic lists.
The taxonomy is subdivided into 13
main branches at level T1. Each T1
branch is subdivided in a number of
branches at level 2. The same process leads to levels 3 and 4.
Not all levels are necessarily present for each main branch. The
taxonomic lists are always presented in two languages, usually
Latin and a modern language. The language selection is set in
advance and remains permanent, but can be changed at any
moment.

How-to on TA98 lists

The selection "TA98 lists" on the
top menu provides access to all the
TA98 original lists of the website.
The original TA98 is
an integral part of the terminology.
The progresses of the terminology
are always done in reference to the
past versions of the terminology.

Moreover, the world of anatomists evolves at different speeds
for different actors. It is not realistic to think that even the
best update decisions will be immediately accepted in practice.
People are not ready to reprint the large anatomical
documentation for each proposed update!
The TA98 lists include trace lists for documentation of the
transition from TA98 to the new terminology.

◀ Return

How-to on vocabulary lists

The selection "Vocabulary" on
the *top menu* provides access to all
the vocabulary lists of the website.
The vocabulary of the terminology
is entirely accessible through
dedicated lists of words, either
a full alphabetical list, or typical
lists by subdomains. The content of
those subdomains is relatively arbitrary and is done in
accordance to pragmatic criteria.
With this selection, access to the word sublists and browse
them to retrieve a searched occurence.

around the website.

◂ Return

How-to on guided tours

The selection "Guided
tours" on the *top menu* provides
access to all the guided tours.
The concept of guided tour is
an initiative in favor of those users
who want to make an accompanied
walk through the website. This is a
way to discover surprising capabilities when navigating between
pages and to improve our own ability to easily retrieve what we
are looking for.
All available guided tours are accessible with this selection.

◄ Return

How-to on the book on Universal Terminology

The selection "The book on Universal Terminology" on the *top menu* provides access to all the chapters of this book. This book contains the scientific documentation of the terminology. It is available under the form of more than 25 chapters, about all aspects.

Documentation and help system

Help System
Guided tours
The book on Universal Terminology
About Terminologia NeuroAnatomica

The Universal Terminology is a concept to make the terminology independent of languages. A system of auto generation of terms is designed to support the term generation based on a universal formula, guaranteeing the coherence between languages. This concept considerably save the need for manpower to develop and maintain the terminology.

How-to on Terminologia NeuroAnatomica

The selection "About Terminologia NeuroAnatomica" on the *top menu* provides access to a presentation of the TNA. The TNA is about a third of the entire terminology. TNA is more complex to represent because its
